

Sometimes, the most economical solution is not the most sensible one. However, Facilities Maintenance is both.

Although he seems pretty content on the floor, he would be even happier with a chair.

Facilities Maintenance is important for a happy and successful workplace.

Here's Why:

- Manage work orders and product orders
- Maintain a business standard
- Stay prepared
- Keep your business running smoothly
- Make sure everything is operating according to code
- Know who enters and exits - authorized or unauthorized
- Keep employees and visitors safe

Facilities Management is what you get if you like and care about the people you work with.

Taking the stairs because the elevator stopped working does not count as your daily exercise.

And sitting in the dark because the lights timed off but you need to get that report in, is not helping your vision any.

Don't get caught in the dark. Find out how to better your business.
